Recommended for 2016 Construction Loan Funding:

Lexington Flood Control

S Fork McCorkle Creek Stormwater Detention Facility

County:	**Cowlitz**
Legislative District:	**19th**
PWB Loan Request:	**$4,600,000**
Other Funds:	**$543,000**
Total Project Cost:	**$5,143,000**

Serves:

- **Community Facilities: 2**

This project will raise the existing detention facility on the South Fork of McCorkle Creek approximately 15 feet. The McCorkle Creek Pump Station does not have adequate capacity to discharge peak stormwater flows during a 10-year event from McCorkle Creek to the Cowlitz River. During a 10-year event or higher, roads and homes in the lower portion of the McCorkle Creek drainage basin are prone to flooding. This project is a critical element in reducing flooding in the lower portion of McCorkle Creek Basin.
